PROFESSIONAL SUMMARY

Final-year Electrical and Electronics Engineering student skilled in querying, cleaning, and analyzing data using SQL, Python, and Power BI to support clear, data-driven decisions. Experienced in building interactive dashboards, DAX-based metrics, and query optimization to turn raw data into actionable insights. Built practical projects such as a Power BI sales analytics dashboard and a natural-language data query tool. Seeking a Data Analytics role to apply strong analytical thinking to real-world business data.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript

Data Visualization & BI: Power BI, DAX, Power Query, Microsoft Excel

Data Analysis: Data Cleaning, Data Validation, Query Optimization, Exploratory Data Analysis

Databases: MySQL, MongoDB, Database Design

Automation & AI (Add-on Skill): Google Gemini API, LLM Integration

Tools & Platforms: Git, GitHub, VS Code

EDUCATION

Bachelor of Engineering (B.E.) — Electrical and Electronics Engineering

2023 – 2027

Sri Shakthi Institute of Engineering and Technology, Coimbatore | CGPA: 8.20

Higher Secondary Certificate (HSC)

2023

Pachamuthu Matriculation Higher Secondary School, Tamil Nadu State Board | Percentage: 81%

PROJECTS

Supermarket Sales Analytics Dashboard

Power BI | Excel | DAX | Power Query

- Developed an interactive sales analytics dashboard using Power BI.
- Cleaned and transformed retail sales data using Power Query.
- Created DAX measures to analyze revenue, gross income, ratings, and tax.
- Designed interactive dashboards with slicers, KPI cards, and charts.
- Generated business insights by analyzing sales across cities, product lines, and time.

AI-Powered SQL Query Generator

Python | FastAPI | React | Google Gemini API | SQLAlchemy | Recharts

- Built a full-stack application that converts plain-English questions into optimized, dialect-correct SQL queries using the Google Gemini API, with automatic database schema detection.
- Implemented a strict SELECT-only execution sandbox using AST-based SQL validation to block destructive statements and ensure safe query execution.
- Built a query performance optimizer that flags anti-patterns and offers actionable tuning suggestions, plus automatic chart visualization of results.
- Added multi-format export (CSV, JSON, PDF) and full query history with search, bookmarking, and execution-time analytics.

CERTIFICATIONS

- Databricks Accredited AI Agent Fundamentals
- Databricks Accredited Generative AI Fundamentals
- Introduction to Databases — NxtWave CCBP Academy
- Artificial Intelligence for All — Infosys Springboard

ACHIEVEMENTS

- Patent filed for Smart Tyre Inflator with Pressure-Adaptive Nitrogen Control.
- IEEE Conference — IEEE Returning Mothers Conference, Bengaluru.
- Idethon — Poster Presentation and E-Quiz.
- Paper Presentation — IoT Based Gas Leakage Detection Technology.

SOFT SKILLS

- Strong analytical and problem-solving skills
- Effective communication and teamwork
- High adaptability and eagerness to learn
- Time management and organizational abilities

HOBBIES & INTERESTS

- Exploring data querying, visualization, and analysis tools
- Competitive programming and problem-solving on LeetCode
- Building personal projects involving data-driven applications
- Following advancements in IoT and automation
